

4-H Horticulture Identification Contest

2019-2020 Rules

Horticulture samples are selected and exhibited (either as an actual sample or a pictorial representation) at separate stations (15 stations for Juniors, 20 for Intermediates, 30 for Seniors). Contestants write both the correct scientific name and common name for each sample. Contestants are given 40 seconds at each station to answer both questions.

Following, you will find the list of plants that the samples will be selected from for the identification contest:
